

# SEPTEMBER 27-28, 2023

## KRUSE TRAINING

### MOLDING DEFECTS

### SEMINAR

**2-Day Seminar Cost is \$1,500 and you will receive a 3-month unlimited access to Kruse Training.**

This 2-Day seminar ***should not be missed***. You will walk away with actionable solutions that you can put to work immediately to make your company more profitable and reduce scrap rates while improving utilization.

Molding defects in injection molded parts range from minor surface defects to major structural issues that significantly impact overall part quality. This seminar covers common molding defects, how and why they occur, and ways to minimize or prevent them.

For a complete outline of the program or to register, click [here](#).

Kruse Training Seminar

Molding Defects

As the leading trainer for VR and animated learning, Kruse Training is bringing their coursework to the West Coast for a 2-Day "Molding Defects" seminar.

The "Circle of Knowledge" is a comprehensive cross-training initiative for part designers, mold designers and process engineers.

Upon completion of this seminar, participants receive a 3-month single-user account with unlimited access to Kruse training.

The cost is **\$1,500 including 3 month subscription**. Successfully complete the certification process during the 3-month period and save 40% over a full year subscription!
